

Midland Industries **DUCTILE IRRIGATION VALVES**

INTRODUCING THE NEW **DUCTILE IRRIGATION VALVES**

Midland is excited to announce our NEW Ductile Irrigation Valves! The new 9640 series valve is a 250 PSI resilient wedge gate valve designed for use in turf/golf, residential and commercial irrigation applications.

The ductile iron body, bonnet and encapsulated wedge provide a 250 PSI valve. The flanged version is stocked 2"-12" with both an operating nut and hand wheel provided for each valve. The threaded/IPS version is available 2"-6" with both op nut and hand wheel, while the "push-on"/ring tight version is available in 2"-8" sizes.

**Innovative, efficient and reliable.
Our new Ductile Irrigation Valves are
here and now available!**

Features include:

- Epoxy coating inside and out that complies with AWWA C550 standard
- Threaded and flanged valve have both hand wheel and op nut provided that can be easily changed in the field
- Valve stems that are made with 420 stainless steel
- EPDM resilient wedge disc
- Working temperature range of 32-176°F
