## GARDEN HOSE FITTINGS

Here at Midland Industries, we have all of the garden hose fittings and options you need, including brass, plastic, and even in lead free options!

Garden Hose Fittings are fittings used to connect garden hoses to a water source, accessory, or other types of hose such as sprinklers, nozzles, sprayers, and many more! These fittings are commonly used in the hose, farming, and landscaping industry.

Brass garden hose fittings are the most widely used fittings for garden hose due to durability and ease of use, though plastic fittings may be needed for certain requirements.

**Note:** Garden Hose Threads are not compatible with National Pipe Tapered (NPT), commonly used in the plumbing industry.

**Innovative, efficient and reliable. Our Garden Hose Fittings come in a variety of options for any application you need!**

#### Temperature & Working Pressure Ranges:

- From +35°F to +100°F at 75 PSI maximum, or the recommended working pressure of the garden hose. (Not to exceed 150 PSI)
- **Note:** All female connector ends should have a rubber washer inserted prior to useage.
- **FGH** = Female Garden Hose Threads
- **MGH** = Male Garden Hose Threads
- Male garden hose threads are all 3/4" with an outside diameter of 1.0625 and 11-1/2" threads per inch.

**SELECT FITTINGS ALSO AVAILABLE IN LEAD FREE & PLASTIC!**
