## Made For Any Application **WAFER CHECK VALVE**

---

In stock and ready to ship is our newest addition to the fast-growing Midland valve line. Our double door spring-loaded, check valves have a ductile iron body and are tested to a working pressure of 300 PSI. The Aluminum Bronze disc and EPDM seat combination are made to handle almost any water application including chemigation. In sizes from 2"-16" these fusion bonded epoxy coated valves are made for any application where you just can't fit a full body check valve.
