

All New Midland Industries **PRESS BALL VALVES**

PLACE AN ORDER TODAY!

You Expect More, **YOU GET MORE FROM MIDLAND INDUSTRIES.**

The Midland Series 940 LF Press Ball Valve features precise press technology, the best method for testing connections before operating at high pressure. Faster, safer and more dependable, our Press Ball Valves are quick and easy to install – adding confidence to your entire project.

This heat-free method for joining copper tubes incorporates a special EPDM O-ring that allows water or air past the sealing element of any unpressed connection. Leaks are detected early and hazards are avoided.
